PROFESSIONAL SUMMARY

Second-year B.Tech Computer Science student seeking internships in software development, full-stack and frontend development, Python development, AI and data science. I build practical applications across the stack, from React interfaces to FastAPI and Node.js backends, and work in Python, Java, C++ and JavaScript.

TECHNICAL SKILLS

Languages: Python, C, C++, Java, JavaScript, SQL
Frontend: HTML5, CSS3, React.js, Vite, Tailwind CSS
Backend & APIs: Node.js, Express.js, FastAPI, REST APIs
Databases & Auth: MongoDB, PostgreSQL, Firebase, JWT Authentication
Tools: Git, GitHub, VS Code, Figma, Canva
CS & Data: Data Structures and Algorithms, Object-Oriented Programming, pandas (beginner)

EXPERIENCE

Python, FastAPI
Global Terrorism Database (Kaggle, START-UMD/gtd)

- Built Sentinel, an AI-powered threat analysis dashboard on the Global Terrorism Database covering 181,691 incidents,
- ,868 fatalities, 523,869 injuries and 205 countries.
- Developed a FastAPI backend behind modules for a global threat map, country intelligence, incident exploration, attack
- prediction, threat forecasting and an intelligence overview.

PROJECTS

WellnessAtWork — Corporate Employee Wellness Platform (in progress)

- React, Vite, Tailwind CSS | Planned backend: Node.js, Express.js, MongoDB, JWT, Socket.io, Firebase
- Building the React frontend for a wellness platform with challenges, activity logging, points, leaderboards, rewards, mental
- wellness resources and appointment booking.
- Backend with authentication and real-time features is planned and not yet integrated.

Milestone Hub — Goal and Productivity Tracker
Technologies: React.js, JavaScript

- Built a goal-tracking platform with one dashboard for goals, milestones, tasks, analytics, timelines and progress.

SmartRide — Carpool Simulation System
Technologies: C++, Data Structures and Algorithms

- Developed a carpool simulation that groups riders, assigns vehicles and finds optimal routes using data structures and
- algorithms.

Sports Club Management System — Java Desktop Application
Technologies: Java, Swing

- Built a Swing GUI with tables, menus and dialogs for member management and expiry alerts, using collection-based data
- handling and persistence.

Car Parking Management System — C++ Console Application

- Manages parking slots, records vehicle information and parking records, and calculates parking fees automatically.

Tic-Tac-Toe — Browser Game

- Built a browser-based Tic-Tac-Toe game using HTML, CSS and JavaScript.

EDUCATION

University
B.Tech in Computer Science and Engineering, ITM Skills University Expected 2029

CERTIFICATIONS & CREDENTIALS

• Deloitte Forage · Technology Job Simulation (Coding Development) Sep 2026
• Simplilearn SkillUp · Introduction to HTML Feb 2026
• HackerRank · SQL (Basic), SQL (Intermediate), Node.js

ACHIEVEMENTS & ACTIVITIES

- Ranked 16 out of 50 participants in the internal Smart India Hackathon (SIH) at ITM Skills University.
- SummerHacks 2026, organized by ITM Skills University in collaboration with Notion.
